1	INTRODUCTION	Agrawal A, Gans J, Goldfarb A.	2019	The digital transformations in various industries have mainly been driven by the development of artificial intelligence Over the past four years, there has been a tremendous growth in Al investments worldwide The 2016 report by Gartner revealed that the actual deployment of Al technology had been undertaken by a mere 9% of organizations, but the number increased to 25% three years later in 2019 with the Enterprise Digital Research projecting the growth rate to double

2	ARTIFICIAL	Rettas, D.,	2022	Banks are
	INTELLIGENCE	Lerner, S., and		constantly forced
	IN BANKING	White, B		to transform their
	SERVICE	,		operations in
	SECTOR			order to stay
				relevant in a
				complex and
				competitive
				sector. To do so,
				the key is in
				maintaining
				customer loyalty
				which includes
				addressing the
				aspects of
				customer trust,
				satisfaction,
				commitment and
				perceived value
				Constant
				improvements on
				customer service
				and the use of
				advanced
				technologies can
				redefine the
				processes of
				banking services
				as proven by
				Google and
				Facebook. Yet,
				many
				conventional
				banking services
				providers fail to
				provide the
				needed flexibility
				and innovative
				capabilities.

_	THEORETICAL	Chui M.	2022	
3		Citui IVI.	2022	Alim the context
	FRAMEWORK			Al in the context
				of the Sri Lankan
				banking service
				sectors
				This organization-
				level theory
				entails the
				dimensions of
				technology,
				organization and
				environment that
				influence the
				adoption and
				implementation of
				technology in
				banks and of
				which had been
				empirically
				proven to be
				suitable for
				analyzing
				innovation
				The dimension of
				technology
				entails bank-
				related internal
				and external
				technologies
				whereby the
				former refers to
				the bank's current
				technologies
				which establish
				the pace and
				scope of
				technological
				transformations
				that banks can
				take on, whilst the
				latter refers to
				new technologies
				available in the
				market.

4	METHOD,	Nadimpalli, M.	2018	This study employed
	ANALYSIS			qualitative approach
	AND FINDINGS			using interviews to
	OF THE STUDY			gather insight about the
				challenges faced by
				banks in Sri Lanka in
				adopting Al and
				subsequently offer
				guidelines on how to
				address the identified
				challenges. Firstly, the
				data collected was
				analyzed to identify the
				major challenges.
				Secondly, the guidelines
				were developed based
				on the interview findings
				and comprehensive literature review. There
				were three dimensions
				studied based on the TOE framework and built
				up according to the
				experts' statements namely technology,
				organization and
				environment. The TOE
				framework was found to
				be a suitable theoretical
				basis as it covers all the
				bank-relevant
				dimensions.
				difficitions.

_	DISCUSSION	Danahathan		A1 de sa mat imaite
5	DISCUSSION	Ransbotham,	2022	Al does not incite
	AND	S., Gerbert,		transformations
	CONCLUSION	P., Reeves,		solely on its own.
		M.A.R.T.I.N.,		As demonstrated
		Kiron,		in this study, Al
		D.A.V.I.D. and		adoption still
		Spira,		meets opposition
		M.I.C.H.A.E.L.,		from banking
				sectors. By
				structuring the
				findings to the
				research model,
				it is revealed that
				Al adoption is
				driven by several
				factors primarily
				the continuous
				digitization of
				banking
				operations and
				the structural
				change of
				existing banks.
				The proposed
				guidelines
				highlight the
				crucial need for
				employees and
				banks to be able
				to utilize Al
				technologies
				properly and
				effectively. As
				shown by this
				study, Al is
				transforming
				banking service
				by breaking the
				historical bonds
				that have long
				held banking
				sectors together,
				and is now
				forming an axis
				where past and
				current
				competences are
				being conjoined
				in novel ways.
				Each factor and
